

A LONG-RUNNING ATTACK UPON OUR SOCIETY

Betty Friedan, formerly Bettye Goldstein, was a founder of the subversive, left-wing feminist movement. She was also co-founder of the National Organisation for Women in America. This women's rights organisation parallels the mischievous black civil rights movements. Both left-wing camps had a common purpose of undermining European Christian rule, while creating discontent and civil unrest. Their ultimate goal is to remove all Christian European influence and bring about the genocide of the white nations.

Betty Friedan

Friedan's, and other women's rights organisations have de-feminised much of the female population and undermined their valuable purpose in society. The mother's traditional role as guardian of family morals, setter of guidelines for behaviour, and protector of her children has been expunged by the vociferous left-wing entertainment and "populist" politics industries. The women who under the guise of freedom that have wanted to become more like men have lost respect and their lady status. On the other hand, many men have been made more effete or feminine, and the change has depleted them of their natural manly instinct to defend their family, nation and race.

Gloria Steinham, another American, Jewish champion of "sexual liberation" has done much to bring about the loss of child innocence. This has led to a rapid increase in teen pregnancies and a wide-scale spread of sexual diseases, often resulting in infertility. Steinham's Marxist and anti-Christian activities have been financed via the CIA department of the American government. European nations have too readily allowed themselves to be manipulated. As a result of this Jewish / Communist attack upon our beliefs and traditional values, western white societies have become seriously dysfunctional and are rapidly diminishing in their numbers.

Although many feminists (and there is a misnomer) have had to admit that the promotion of their ideas has had disastrous results, we still see the likes of dowdy, Germaine Greer on our television screens treated with celebrity status. More intelligent people who had the foresight to see where the feminist movement would lead us would have spoken out against it. They were as usual prevented from voicing their opinions by the left-wing controlled mass media.
